Dear Colleague:

This questionnaire is being circulated to all members of the National Academy of Sciences in the sections for Botany, Zoology, and Biochemistry. This is an informal poll which I am making for my own information; to help decide whether to press for the establishment of a section on Genetics, (which I believe to be essential for the health of the science and of the Academy.) I will greatly appreciate your returning this questionnaire, even if you are non-committal.

Many thanks for your
kind contributions
last October. Please
forgive my failure to
acknowledge them sooner.
Best regards,
J. Lederberg

Yours cordially,

Joshua Lederberg
